DATE MAILED: 11/01/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/777,478

Applicant(s)

FUNNELL, NICOLA

Examiner

Muthuswamy G. Manoharan

Art Unit

2683

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 and 5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by 3GPP (TS 25.331 v3.16.0 (2003-9)) (hereinafter Reference (A)).

Regarding claim 1, Reference (A) teaches a method for handling system information in a mobile telecommunications system, the system comprising a network of a plurality of cells and at least one user equipment device, the method comprising, in the user equipment device: receiving a first ("system Information Block type 12" in Section 8.1.1.6.11) and a second system information block ("system Information Block type 12" in Section 8.1.1.6.12), the first system information block relating to idle and connected mode (line 2, 14, and 22 in Section 8.1.1.6.11) and the second system information block relating to connected mode (line 1 in Section 8.1.1.6.12); each of the first and second system information blocks relating to measurement information (lines 7-9, lines 24-28 and lines 31-32 in Section 8.1.1.6.11; lines 14-53 in Section 8.1.1.6.12) and including at least one system information block information element (lines 29-31 in Section 8.1.1.6.11) and associated system information ("measurement identity", line 20 in Section 8.1.1.6.11);

for any system information block, information element relating to a cell information list, determining whether the same system information block information element is included both in the first system information block and the second system information block (lines 49-50 in Section 8.1.1.6.11); and

when the same system information block information element relating to a cell information list is included in both the first system information block and the second system information block, applying the system information associated with the system information block information element in the first system information block before applying the system information associated with the system information block information element in the second system information block (Section 10.3.7.44, lines 1-10; Section 8.1.1.4, lines 1-3; Section 8.5.23, lines 6-15; Section 10.3.7.45; lines 1-7).

Regarding claim 2, Reference (A) teaches a method according to claim 1, wherein the system information block information element is selected from the following system information block information elements; an information element relating to an intra-frequency cell information list (Section 10.3.7.33), an information element relating to an inter-frequency cell information list (Section 10.3.7.13) and an information element relating to an inter-Radio Access network (RAT) cell information list (Section 10.3.7.23).

Regarding claim 3, Reference (A) teaches a method according to claim 1 wherein the system information block information element is any of the following: "intra-frequency cell info list", "inter-frequency cell info list" and "Inter-RAT cell info list" (lines 28-30 in Section 8.1.1.6.11 and lines 8-10 in section 8.1.1.6.12).

Regarding claim 4, Reference (A) teaches user equipment device for a mobile telecommunications system, the system comprising a network of a plurality of cells ("cells" on Page 56, line 6) and at least one user equipment device ("UE" on Page 56, line 8), the user equipment device being arranged to carry out the steps of claim 1.

Regarding claim 6, Reference (A) teaches a method for handling system information in a UMTS mobile telecommunications system, the system comprising a network of a plurality of cells and at least one user equipment device, the method comprising, in the user equipment device:

receiving a system information block of type 11 ("system Information Block type 12" in Section 8.1.1.6.11) and a system information block of type 12 ("system Information Block type 12" in Section 8.1.1.6.12), the system information block of type 11 relating to idle and connected mode (line 2, 14, and 22 in Section 8.1.1.6.11) and the system information block of type 12 relating to connected mode (line 1 in Section 8.1.1.6.12), each of the system information blocks relating to measurement information (lines 7-9, lines 24-28 and lines 31-32 in Section 8.1.1.6.11; lines 14-53 in Section 8.1.1.6.12) and including at least one system information block information element (lines 29-31 in Section 8.1.1.6.11) and associated system information ("measurement identity", line 20 in Section 8.1.1.6.11); for any system information block information element relating to a cell information list, determining whether the same system information block information element is included both in the system information block of type 11 and the system information block of type 12 (lines 49-50 in Section 8.1.1.6.11), and when the same system information block information element relating to a cell

information list is included in both the system information block of type 11 and the system information block of type 12, applying the system information associated with the system information block information element in the system information block of type 11 before applying the system information associated with the system information block information element in the system information block of type 12 (Section 10.3.7.44, lines 1-10; Section 8.1.1.4, lines 1-3; Section 8.5.23, lines 6-15; Section 10.3.7.45; lines 1-7).

Regarding claim 7, Reference (A) teaches a method for handling system information in a 3G UMTS mobile telecommunications system, the system comprising a network of a plurality of cells and at least one user equipment device, the method comprising, in the user equipment device: when System information Block (SIB) 11 and SIB 12 are received with information elements relating to any of "intra-frequency cell info list", "inter-frequency cell info list" and "Inter-frequency cell info list" (lines 28-30 in Section 8.1.1.6.11 and lines 8-10 in section 8.1.1.6.12) then the system information associated with the system information block information element in SIB 11 is applied before the system information associated with 20 the corresponding system information block information element in SIB 12 (Section 10.3.7.44, lines 1-10; Section 8.1.1.4, lines 1-3; Section 8.5.23, lines 6-15; Section 10.3.7.45; lines 1-7).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Reference (A) in view of Laitinen et al. (hereinafter Laitinen) (US 6765891).

Regarding claim 5, Reference (A) teaches all the particulars of the claim 1, except a computer program product comprising program code means stored on a computer readable medium when the program is run on a computer. However, Yi teaches in analogous art, (Col. 4, lines 29-40) computer program product comprising program code means stored on a computer readable medium when the program is run on a computer. Therefore, it would be obvious to one of ordinary skill in the art at the time invention to implement the method using a computer program product comprising program code means stored on a computer readable medium when the program is run on a computer. This modification provides a method of implementation of Radio Resource Control protocol for the UE-UTRAN radio interface.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Muthuswamy G. Manoharan whose telephone number is 571-272-5515. The examiner can normally be reached on 7:30AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Trost can be reached on 571-272-7872. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2683

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
